EDUCATION

Bethel College

Bachelor of Science in Computer Science, Minor in Mathematics

North Newton, Ks

Aug 2021 - Dec 2024

EXPERIENCE

Software Developer — C#, JavaScript, Blazor, Ef Core, SQL

Dec 2024 – Present

INTRUST Bank

Wichita, Ks

- **Developed and maintained over 30+ production .NET web applications to reduce fraud and supporting operational, financial, and compliance workflows**
- **Sole Developer** of a mission-critical investment wealth management platform processing **\$9 Billion in client assets. Eliminated quality assurance errors** by implementing server-side validation rules and a multi-step workflow, preventing hundreds of thousands in overdraft errors and trade execution failures that previously impacted client accounts and bank reputation.
- **Engineered incident tracking and executive reporting system** serving 100+ users across multiple departments, replacing legacy Access database. Delivered automated analytics dashboards and templated incident write-ups presented to executives to assess and report on security incidents to regulators and board members.
- **Co-Developer** of a Treasury Services platform used by **all business banking customers to configure and enforce critical account services, including real-time ACH limits, wire permissions, Positive Pay, balance reporting, and much more.** Enhancing an existing system with role-based controls, audit logging, and exportable reports to improve regulatory compliance.
- Maintained shared **internal NuGet libraries**, built **GitHub Actions CI pipelines** to automate build and test workflows, and enhanced the internal application home site with enhanced error logging for developers to pinpoint issues, online user communication, and a centralized documentation.

Front-End Software Engineer Intern — Typescript, React

May 2024 – Aug. 2024

Leggett and Platt

Lenexa, Ks

- Developed **React** components for an internal home furniture application using **TypeScript** and **Tailwind CSS**, streamlining business operations by assisting in the transition away from spreadsheets.
- Implemented in-platform communication features, and **integrated multi-language support**, enabling accessibility for hundreds of employees across 20+ branches across North America, Europe, and Asia.

PROJECT HIGHLIGHTS

Solar Eye | React, Three.js, WEBGL | <https://shorturl.at/IqEkN> **2024 NASA Space-Apps Award Winner**

- Built a solar system simulator using data from NASA APIs to display orbits of near earth objects and teach users about Keplerian orbital parameters and the dangers of near earth asteroids. **Received multiple NASA awards**

Stellar View | React, Python | <https://stellarview.us/>

NASA Space-Apps Challenge 2025

- Built live satellite imagery viewer in 36 hours integrating 5 NASA data sources (GOES EAST/WEST, MODIS, VIIRS) with time-scrub functionality and real-time satellite position tracking

LEADERSHIP

Bethel Software Society - Founder

- Founded campus software development club providing technical mentorship and project collaboration to students. Led team in hackathons, NASA Space Apps Challenge awards and earned "Most Promising New Student Organization" recognition from college faculty

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, HTML, CSS, SQL

Databases: SQL Server, MySQL

Developer Tools: Git, Docker, CI/CD, Azure

Libraries/Frameworks: React, Blazor

Also Familiar With: C, Google Cloud Platform, Flask, Python, Java
